

## ***PRESS RELEASE***

Houston, TX February 16, 2010 – BirdNest, a company that provides water data collection and report management systems for the water/wastewater industry, had two abstracts selected for presenting at upcoming industry events.

“Digital Revolution in Water Utility Management” was selected for presentation at the 2010 DistribuTECH Conference and Exhibition, to be held on March 23-25, 2010 in Tampa, Florida!

DistribuTECH has increased programming for the water industry and will include more water exhibitors and attendees in 2010. BirdNest will present on March 23, 2010 at 2:30 PM EST.

“Digital Revolution in Ground Water Utility Management” was selected for presentation at the 2010 Ground Water Summit taking place April 11-15 in Denver, Colorado.

The 2010 Ground Water Summit is designed to bring together a mix of regulators, practitioners, natural resource managers, policymakers, municipal planners and others who supply knowledge and technology needed to address key water issues. BirdNest will present on Monday, April 12, 2010 at 4:10 PM MST.

BirdNest provides a secure, web-based reporting and optional phone-based data collection tool that provides real-time control over critical operating data. This powerful digital data system and data efficiency tool helps water utility managers increase operator productivity, control personnel costs, spot problems quickly, use data effectively for long-range planning, and improve overall compliance, accountability and reliability.
