

Innovative data collection and reporting system

Graphing pump hours and electricity usage helps budget for needed improvements in this Michigan Township.

Why BirdNest?

Dr. Greg M. Tatara

"BirdNest made it easy for me graph the pump run hours versus kilowatt hours to demonstrate in a board meeting the need to purchase a new pump. The data showed that over time the savings in electricity and efficiency would cover the cost of the pump."

Greg Tatara, Utilities Director, Genoa Township, MI
